SDN® Technology

allows for low-cost, high-throughput nanocomposite multifunctional coatings deposition on almost any substrate.

PRESS RELEASE

January 11, 2016
For Immediate Release

SUNNYVALE, Calif. (January 11, 2016) – Advenira Enterprises, Inc. announced that on December 18, 2015, it has entered into licensing agreement with NAMICS Corporation.

NAMICS was founded in 1946 (then – under the name Hokuriku Toryo Co., Ltd.). The company focused on developing various coatings and pastes for electronic, and built a great reputation for its high quality products and solutions. In 1996, to commemorate the 50th anniversary, the company name was changed to NAMICS CORPORATION.

Advenira Enterprises, Inc. is the developer of Solution Derived Nanocomposite (SDN®) technology for environmentally friendly protective and optical coatings. Headquartered in the very heart of the Silicon Valley, Advenira® provides advanced performance coatings to reduce GHG (green house gases) emissions and carbon footprint for many industries.

Under the license terms, NAMICS will be a supplier of Thixorion™ to various market segments worldwide. NAMICS also received limited exclusive rights to manufacture and sell Thixorion™ in Asia.

The Thixorion™ SDN® nanocomposite coating is an aqueous formulation that has an excellent combination of mechanical, electrical and chemical resistant properties that makes it extremely useful for a wide variety of applications, including abrasion resistance, corrosion resistance, erosion resistance (including that of direct ion bombardment during plasma processing), as well as a dielectric layer and friction reduction.

A complete Data Sheet for Thixorion™ is available here: <http://www.advenira.com/protective-coatings.html>

Advenira is very excited to form this licensing partnership with NAMICS, and believes both companies will have a great future together.

Advenira Enterprises, Inc. is a California-based company located in the heart of Silicon Valley known for its novel Solution Derived Nanocomposite (SDN®) technology that allows for low-cost/high-throughput multifunctional coatings deposition on practically any type/shape/material substrate. The nanoscale protective and optical coatings are environmentally friendly. The company was founded as a means to address the world's increasing energy consumption and waste. Advenira commercializes its patented coatings technology in the Glass, Corrosion and other markets – spanning the world's most important industries - with dramatic advantages over traditional techniques.
